Key Benefits:

- Authentic, rich Aloe vera gel
- Perfect as a light moisturizer
- Soothes burns, cuts, scrapes and bites

What is it?

Aloe Gelée is a non-sticky gel that provides all the soothing benefits of Aloe vera gel and other natural botanicals. Aloe Gelée was created to offer the benefits of a fresh aloe plant in a form you can take with you anywhere. It is perfect to protect sun-exposed skin or to soothe cuts, burns and scrapes.

The Aloe vera story

The Aloe vera plant has been used for centuries for instant relief. No one knew what made aloe so effective until RBC Life's founder, Clinton Howard, began the first major research project to reveal the chemistry of aloe.

Over the next 10 years, his research led to the isolation of aloe's components and revealed its numerous healthful properties. Unfortunately, many aloe products on the market are not effective because they are not processed properly. RBC Life brings you the finest Aloe vera products available. Our unique process retains the integrity of the rich aloe gel to ensure that you benefit from this legendary botanical.

With the desire to capture the benefits of Aloe vera in a convenient form, Clinton Howard developed Aloe Gelée. This non-sticky gel provides all of the soothing benefits of Aloe vera and other natural botanicals. Just as important as what is in your skin care, is what's not in your skin care! With Aloe Gelée you will find NO parabens or fragrances and the product is never tested on animals.

Aloe Vera Works

Aloe contains natural immune factors that quickly relieve pain sensations and speed the body's natural processes. It accelerates cell regeneration, enhances circulation and supports the body's ability to fight off bacteria and to assist in the recovery from burns. Aloe Gelée is the finest Aloe vera gel from the "Father of Aloe" himself.
