- Liver cleansing*
- Digestive support*
- Improved liver function*

What is it?

Artichoke Liver Cleanse is a highly effective herabl supplement that supports the liver’s natural detoxification processes. Artichoke has been shown to help rid the liver of harmful toxins and help maintain healthy liver function. Artichoke Liver Cleanse was formulated to provide a simple, natural way to cleanse the liver in 2 weeks. It can also be used daily to help maintain normal liver function and support the digestion of fats.*

The Power of Artichoke

Artichoke extract contains powerful bioflavonoids known for their detoxifying properties. They work to cleanse the liver and protect it while it releases accumulated toxins. After allowing the liver to cleanse and rebuild itself, it can better do its job of protecting the body from harmful substances.*

A Simple Liver Cleanse

One of the easiest and most effective ways to nourish, cleanse and support the liver is with Artichoke Liver Cleanse from RBC Life. Unlike other methods of liver detoxification, it has been shown that artichoke protects the liver from damage as these toxins are being excreted.*

When artichoke is taken as a single dose in the amount present in 6 capsules of Artichoke Liver Cleanse, bile increases 127% after 30 minutes and 152% after 60 minutes. Bile is the vehicle that toxins use to escape the liver, so we must keep it flowing smoothly. These surges in bile production will help you safely and effectively eliminate the accumulations of toxins in the liver. Artichoke Liver Cleanse also contains Echinacea and Spirulina to nourish the immune system during this cleansing process.*
