

VITALOE

Immune and Digestive Support

Item #2500 - Net Weight 5.3 oz (150 g)

Directions:

Add one scoop of VitAloe to water, juice or TruAloe® and consume once a day or more often if desired.

Supplement Facts		
Serving Size: 1 scoop (5 g) Servings Per Container: 30		
	Amount Per Serving	% Daily Value
VitAloe® Proprietary Complex	5 g	†
Inulin, Mannitol, Beta-1,3-Glucan, LifeMannan™ (Bioavailable Acemannan from Inner leaf Aloe vera), Maitake mushroom extract (Grifola frondosa), Nopal Cactus powder (Opuntia ficus-indica) and Astragalus root powder (Astragalus membranaceus).		
† Daily Value not established		

Key Benefits:

- Powerful support for immune cell function*
- Regulates normal bowel function*
- Supports cellular function with important polysaccharides*

What is it?

VitAloe supports your immune system like no other product on the market. VitAloe provides the most powerful polysaccharides from the miraculous Aloe vera plant.*

Discovering the Secrets of Aloe Vera

Aloe vera has long been consumed to support healthy digestion. In 1981 our founder, Clinton Howard decided to scientifically investigate Aloe vera. He wanted to discover its active ingredient and learn how best to process, stabilize, and preserve it to retain its maximum benefits.

Mr. Howard formed a research team and hired scientists charged with the goal of uncovering the secrets of Aloe vera. After four years, the team successfully discovered that the key ingredient is a polysaccharide – a long chain sugar called mannose, later named Acemannan.

The Benefits of Acemannan and VitAloe

Mr. Howard's team learned that Acemannan nourishes our white blood cells called macrophages. These cells are a vital part of our immune system.*

Following this discovery, Mr. Howard had additional studies conducted, all of which confirmed this benefit. The publication of some of these studies resulted in Aloe becoming recognized as an important nutritional product. Today Aloe is one of the world's most desired ingredients in the health and wellness industry.

In an effort to further increase its benefits, RBC Life has combined this mannose concentrate with seven other research-backed plants and extracts to create VitAloe™. This unique product combines natural ingredients that have traditionally been consumed for their immune enhancing properties including Maitake Mushroom, Nopal Cactus, Beta-1, 3 Glucan, and Astragalus Root. It also includes Inulin, which stimulates the growth of healthy bacteria in the digestive tract. Each of these ingredients supports specific cellular functions that are vital to the strength of our immune systems.*
